## CORE STACK

Next.js · React · TypeScript

Node.js · Electron · APIs

PostgreSQL · Linux · Nginx

OpenAI workflows · RAG · Agents

## FOCUS

AI-native products

Business platforms

Developer tooling

Premium client-facing experiences

# Attila Lazar

AI Engineer · Full-Stack Developer · Product Builder

AI engineer focused on AI-native workflows, full-stack product development, and modern digital experiences. Builds end-to-end systems spanning product architecture, frontend interfaces, backend services, deployment, and AI integrations with a strong emphasis on practical execution, technical clarity, and client-facing value.

### Builds

AI-native products, platforms, and polished client experiences

### Works Across

Strategy, UX structure, engineering, deployment, and AI integration

## Professional Strengths

- AI-native product architecture and workflow design
- Full-stack web and desktop application development
- Next.js, React, TypeScript, Node.js, Electron
- LLM integrations, agent workflows, RAG, prompt systems
- PostgreSQL, API design, deployment, Linux and Nginx operations
- Brand-conscious execution for premium client-facing products

## Selected Product Work

### ATiQ / AI-Native IDE Direction

Electron · TypeScript · Node.js · AI agents

Designing an AI-assisted development environment with workspace management, side-chat interactions, terminal integration, and structured product planning for modern software teams.

### ARiS / Creator & Assistant Systems

AI orchestration · Product systems · UX architecture

Developing prompt-driven product systems and assistant experiences for creation workflows, automation, and multi-surface user experiences across web and desktop contexts.

### LRDEnE / Legal-Tech Product Direction

Next.js · TypeScript · Product strategy · SaaS architecture

Planning and structuring a legal-AI platform with trust-focused product architecture, lead capture flows, content strategy, and future client portal capabilities.

### Industry MVP Blueprints

Blueprinting · Full-stack delivery · Client systems

Creating implementation-ready blueprints and MVP systems for restaurants, agencies, portfolios, and business platforms with an emphasis on usable scope, modern UX, and deployment readiness.

## Client Services

- AI product strategy and implementation planning
- Full-stack web application development
- Developer tooling and internal platform concepts
- MVP architecture, UX structure, and technical execution
- Portfolio, SaaS, and business platform builds

Portfolio note: this résumé is designed as a downloadable portfolio summary to accompany a live website with demos, case studies, and proof-of-work.
